Exercise 1. Determine the truth values (i.e., T or F) of the following propositions: 19-4=12 if and only if 3 is a prime number. If 1 + 1 = 5, then 1 + 1 = 3. If the moon is a star, then so is the sun. If 5 is a prime number, then the earth is flat. 0 > 1 if and only if 2 > 1. Either Toronto is the capital of Canada or Hamburg is the capital of Germany. prime no 1+1 = S F moon star
